Hardware Installation
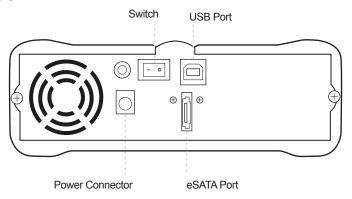

1.   Connect the power adapter to the power connector located at the back
        of the enclosure.

2.   Connect the data cable using

        a.   eSATA connection
                Note: You should have configured the eSATA host controller
                on your system before you connect the writer. Once the
                eSATA host controller is configured, do the following steps
                below.

                Plug-in the eSATA cable to the eSATA port on the enclosure
                and attached the other end to your eSATA host controller.

        b.   Or USB2.0 connection
                Attach the USB cable to the USB port on the enclosure and in
                your system.

3.   Power ON the enclosure using the switch on the back panel. You
        should see the Green Power LED on the front panel at the bottom right
        light up.

Note: Windows 2000 & XP use built-in USB drivers. No need to install
third-party drivers.

Software Installation

DVD and CD Copying Software Installation:

1.   Load the DVD and CD Copying Disc onto the CD-ROM or DVD-/+R/RW
        drive.
2.   Click on the Install Button to start installation process.
3.   Follow the On screen Wizard for installation.
4.   Wait for a few seconds to finish the installation.
5.   Restart the system when prompted.
6.   You may now burn CD or DVD disc.

Note: Serial Number or CD key can be found on the CD sleeve if prompted.

Please read the On-Line Help of the software for all the detail commands and features
of the software.
